Hindi (**hi**) —  Complete

Greek (**el**) —  Complete

Italian (**it**) — 313 missing

aria (6 keys)

- **aria_move_e** — Move right
- **aria_move_ne** — Move upper-right
- **aria_move_nw** — Move upper-left
- **aria_move_se** — Move lower-right
- **aria_move_sw** — Move lower-left
- **aria_move_w** — Move left

blog (1 keys)

- **blog_subtitle** — Updates, strategy, puzzle releases, and notes from the team.

duel (2 keys)

- **duel_chat_header** —  Chat
- **duel_chat_placeholder** — Message your opponent...

err403 (1 keys)

- **err403_sub** — You don't have permission to view this page. This area is restricted to admins o

err404 (3 keys)

- `err404_lb` — Leaderboard
- `err404_play` — Play Minesweeper
- `err404_sub` — Looks like you've clicked on a mine. This page doesn't exist.

`jig` (43 keys)

- `jig_btn_gallery` —  Gallery
- `jig_btn_pause` —  Pause
- `jig_btn_restart` —  Restart
- `jig_btn_sound_toggle` — Toggle sound
- `jig_col_puzzle` — Puzzle
- `jig_custom_label` — Custom puzzle
- `jig_daily_subtitle` — Same image for every player · Resets at midnight UTC
- `jig_diff_beginner` — Beginner
- `jig_diff_beginner_count` — Beginner (100)
- `jig_diff_expert` — Expert
- `jig_diff_expert_count` — Expert (1000)
- `jig_diff_inter_count` — Intermediate (500)
- `jig_diff_intermediate` — Intermediate
- `jig_htp_controls_h2` — Controls
- `jig_htp_ctrl_gallery_desc` — browse and start puzzles from other images.
- `jig_htp_ctrl_mute` — **Mute** — toggles the snap sound effect.
- `jig_htp_ctrl_pause` — **Pause** — stops the timer. Signed-in users can close the page and
- `jig_htp_ctrl_restart` — **Restart** — resets the puzzle with the same image and difficulty.
- `jig_htp_ctrl_timer` — **Timer** — starts on your first piece interaction.
- `jig_htp_custom_h2` — Custom Puzzles
- `jig_htp_custom_p` — Use the [Puzzle Generator](#) to upload your ow
- `jig_htp_daily_p1` — One image is selected each day, the same for every player. The puzzle resets at
- `jig_htp_daily_p2` — Guest scores are accepted but cleared at midnight UTC. Registered user scores
ar
- `jig_htp_diff_col_grid` — Grid
- `jig_htp_diff_col_level` — Level
- `jig_htp_diff_col_pieces` — Pieces
- `jig_htp_diff_h2` — Difficulty Levels
- `jig_htp_goal_h2` — Goal
- `jig_htp_goal_p` — Assemble all the pieces of the image on the board. The puzzle is complete when e
- `jig_htp_playing_h2` — Playing
- `jig_htp_playing_li1` — Pieces start in the **stash panel** on the right, scattered as if t
- `jig_htp_playing_li2` — **Drag** a piece from the stash onto the board to place it.
- `jig_htp_playing_li3` — When two pieces that fit together are brought within snapping distance,
they <st
- `jig_htp_playing_li4` — Snapped pieces form a **group** that can be dragged as a single uni
- `jig_htp_playing_li5` — Use the **reference thumbnail** (bottom-left of the board) to see t
- `jig_lb_empty` — No scores yet for this day.
- `jig_name_placeholder` — Your name
- `jig_paused` —  Paused

- `jig_pending_review` — ⌚ This puzzle is pending admin review and is only visible to you. It will be pub
- `jig_select_diff` — Select a difficulty to start.
- `jig_submit_btn` — Submit Score
- `jig_submit_score_label` — Submit your score
- `jig_win_h2` — 🎉 Puzzle Complete!

1b (47 keys)

- `lb_col_hash` — Board
- `lb_col_view` — View
- `lb_date_label` — Date:
- `lb_detailed_title` — Detailed Leaderboard
- `lb_directory_body` — Every scored game, variant, and puzzle has a path from here. Some games use the
- `lb_directory_only_note` — Use the All Leaderboards cards below for this category; each card opens the fast
- `lb_directory_title` — All Leaderboards
- `lb_empty_alltime` — No all-time scores yet — be the first!
- `lb_empty_month` — No scores yet this month — be the first!
- `lb_empty_season` — No scores yet this season — be the first!
- `lb_empty_today` — No scores yet today — be the first!
- `lb_empty_today_past` — No scores recorded for {date}.
- `lb_empty_week` — No scores yet this week — be the first!
- `lb_empty_year` — No scores yet this year — be the first!
- `lb_error_board` — Could not load this leaderboard.
- `lb_full_board_kicker` — Full board
- `lb_full_leaderboard_btn` — Full Leaderboard
- `lb_ng_no_guess` — No-Guess mode
- `lb_ng_standard` — Standard mode
- `lb_no_boards` — No leaderboards found for this filter.
- `lb_no_scores_board` — No scores yet for this leaderboard.
- `lb_no_scores_for_period` — No scores yet for {period}. Be the first to post one.
- `lb_note_alltime` — All-time records — best score per player.
- `lb_note_month` — This month's best score per player.
- `lb_note_season` — {season} — best score per player.
- `lb_note_today` — Today's scores — resets at midnight UTC.
- `lb_note_today_past` — Scores from {date}.
- `lb_note_week` — This week's best score per player.
- `lb_note_year` — This year's best score per player.
- `lb_period_label_alltime` — All Time
- `lb_period_label_month` — This Month
- `lb_period_label_today` — Today
- `lb_period_label_week` — This Week
- `lb_period_label_year` — This Year
- `lb_period_note_default` — Scores reset daily at midnight UTC — can you top today's board?

- `lb_personal_body_guest` — Sign In to keep personal bests, leaderboard placements, and top-three finishes i
- `lb_personal_kicker_guest` — Track your climb
- `lb_personal_kicker_user` — Your progress
- `lb_personal_loading` — Loading your saved results...
- `lb_personal_title_guest` — Save your personal leaderboard story
- `lb_personal_title_user` — Your Leaderboard Snapshot
- `lb_platform_subtitle_default` — Choose any Full Board button above to inspect that leaderboard here.
- `lb_season_label` — Season:
- `lb_showcase_body` — Scan the top three across every scored game, variant, puzzle, and event from one
- `lb_showcase_kicker` — Champions across Minesweeper.org
- `lb_showcase_title` — Top 3 From Around The Site
- `lb_view_stats` — View My Stats

links (57 keys)

- `links_arcade_h2` — Arcade
- `links_arcade_tetris_desc` — a fusion of Minesweeper and Tetris. Blocks fall Tetris-style, but clearing them
- `links_community_h2` — Community
- `links_community_wiki_desc` — the Minesweeper Wiki entry for this site.
- `links_diana_h2` — Princess Diana
- `links_diana_li1` — Diana, Princess of Wales — Wikipedia
- `links_diana_li2` — Diana's landmine campaign — Wikipedia
- `links_diana_p` — Princess Diana famously walked through an active minefield in Angola in 1997 to
- `links_git_h2` — Open Source & Git Repos
- `links_git_mosaic_desc` — — open-source Mosaic puzzle implementation by mordechaim.
- `links_git_org_desc` — — source code for this site.
- `links_git_puzzlegen_desc` — — Tentaizu / minesweeper puzzle generator by hellpig.
- `links_halo_desc` — — the world's largest humanitarian landmine-clearance organization.
- `links_img_diana_desc` — public domain photo of Princess Diana, used on the Lady Di's Mines pages.
- `links_img_galaxy_desc` — panoramic Milky Way photograph by Kaush Dissanayake Photography. Used as the sel
- `links_img_h2` — Image Sources
- `links_img_intro` — Images used on this site are either original, sourced from public domain collect
- `links_landmines_h2` — Landmines
- `links_landmines_p` — Organizations working to clear landmines and support survivors.
- `links_mosaic_conceptis_desc` — — a Mosaic-style puzzle from Conceptis.
- `links_mosaic_ext_desc` — — Mosaic puzzles and related games.
- `links_mosaic_h2` — Mosaic
- `links_mosaic_howto` — How to Play Mosaic — YouTube
- `links_mosaic_p` — Mosaic is a nonogram-style minesweeper variant solved by deduction from numbered
- `links_othergames_ajaxchess_desc` — — our sister site for chess games, Ajax Chess.
- `links_othergames_h2` — Other Games

- [links_play_google_desc](#) — — Google’s built-in Minesweeper game.
- [links_play_h2](#) — Play Minesweeper
- [links_play_ms_desc](#) — — Microsoft’s Casual Games version of Minesweeper.
- [links_play_org_desc](#) — — classic, no-guess, cylinder, toroid, and real-time PvP modes.
- [links_rush_h2](#) — Minesweeper Rush
- [links_rush_steam_desc](#) — — the Minesweeper Rush game on Steam.
- [links_tentaizu_ext_desc](#) — — Tentaizu puzzles and more.
- [links_tentaizu_h2](#) — Tentaizu
- [links_tentaizu_org_desc](#) — — puzzle of the day, 7×7 board, 10 mines.
- [links_tentaizu_p](#) — Tentaizu is a logic puzzle: deduce the position of stars (mines) from the number
- [links_theory_3bv_desc](#) — — definition and background on Bechtel’s Board Benchmark Value.
- [links_theory_h2](#) — Minesweeper Theory
- [links_theory_own_desc](#) — — our own explanation with an interactive max-3BV calculator.
- [links_theory_yt_desc](#) — — general strategy and theory video.
- [links_variants_advent_desc](#) — — a collection of creative minesweeper variant puzzles.
- [links_variants_h2](#) — Minesweeper Variants
- [links_variants_org_desc](#) — — cylinder and toroid topology variants.
- [links_vibe_claude_desc](#) — — the AI coding tool used to build this site.
- [links_vibe_h2](#) — Vibe Coding
- [links_vibe_p](#) — minesweeper.org is built with the help of AI-assisted (“vibe”) coding.
- [links_videos_h2](#) — Minesweeper Training Videos by Grandmaster Dard
- [links_videos_v1](#) — Beginners Guide to Minesweeper
- [links_videos_v1_desc](#) — a guide to building core skills and improving your game from the ground up.
- [links_videos_v2](#) — How to get faster at Minesweeper
- [links_videos_v2_desc](#) — techniques for cutting time and improving your speed once you have the basics do
- [links_videos_v3](#) — Minesweeper: How to play fast AND efficiently
- [links_videos_v3_desc](#) — balancing speed with accuracy to maximise your clear rate.
- [links_videos_v4](#) — Minesweeper: How to play fast AND efficiently (Part 2 — Advanced)
- [links_videos_v4_desc](#) — advanced techniques for experienced players looking to reach the next level.
- [links_videos_v5](#) — Minesweeper Patterns Guide
- [links_videos_v5_desc](#) — recognising and solving the most common mine configurations instantly.

meta (23 keys)

- [meta_desc_2048hex](#) — 2048 on a hexagonal grid — 18 playable cells, a fixed stone in the center, and 6
- [meta_desc_2048hex_htp](#) — Learn how to play 2048 Hexagon — a tile-merging puzzle on a hex grid with 18 cel
- [meta_desc_2048hex_lb](#) — Daily 2048 Hexagon leaderboard — top scores for today's puzzle.
- [meta_desc_jigsaw_daily](#) — Play today's daily jigsaw puzzle on minesweeper.org. Drag and snap pieces togeth
- [meta_desc_jigsaw_htp](#) — How to play the Jigsaw Puzzle on minesweeper.org.
- [meta_desc_jigsaw_lb](#) — Daily leaderboard for the Jigsaw Puzzle on minesweeper.org.
- [meta_kw_about](#) — о сапёре, история сапёра, сапёр леди ди, информация о сапёре
- [meta_kw_default](#) — сапёр, сапёр онлайн, играть в сапёра, бесплатный сапёр, игра сапёр

- `meta_title_2048hex` — 2048 Hexagon | minesweeper.org
- `meta_title_2048hex_http` — How to Play 2048 Hexagon | minesweeper.org
- `meta_title_2048hex_lb` — 2048 Hexagon Leaderboard | minesweeper.org
- `meta_title_board_generator` — Board Generator — Custom Minesweeper Boards | minesweeper.org

- `meta_title_sudoku_expert` — Expert Sudoku — Free Daily Puzzles | minesweeper.org
- `meta_title_sudoku_hard` — Hard Sudoku — Free Daily Puzzles | minesweeper.org
- `meta_title_sudoku_medium` — Medium Sudoku — Free Daily Puzzles | minesweeper.org

`mswchess` (5 keys)

- `mswchess_classic_desc` — 4 mines, rows 4–7 fogged. Pawns are sappers. Kings are immune.
- `mswchess_classic_title` — Classic
- `mswchess_credit` — Minesweeper Chess was developed by our partner <a href="https://ajaxchess.com" t
- `mswchess_play_ajaxchess` — Play on ajaxchess.com
- `mswchess_subtitle` — Chess on an 8×10 board with a hidden minefield. Clear the fog zone in the middle

`nav` (10 keys)

- `nav_tametsi` — Tametsi
- `nav_tametsi_daily` — Tametsi Daily
- `nav_theme_auto_desc` — Follows system light/dark
- `nav_theme_classic_desc` — Lady Di's Mines
- `nav_theme_dark_desc` — Classic dark theme
- `nav_theme_flower_desc` — Floral night theme
- `nav_theme_light_desc` — Daylight-friendly
- `nav_theme_mexico_desc` — Fiesta theme
- `nav_theme_tentaizu` — Tentaizu
- `nav_theme_tentaizu_desc` — Star & space theme

`other` (10 keys)

- `other_15puzzle_desc` — The classic sliding tile puzzle — also known as the Gem Puzzle or Game of Fifteen
- `other_2048_desc` — The classic number-merging puzzle. Slide tiles on a 4×4 grid to combine matching
- `other_2048hex_desc` — 2048 on a hexagonal grid — 18 tiles, a fixed stone in the center, and 6 directio
- `other_daily_puzzle` — Daily Puzzle

- `other_generator` — Generator
- `other_jigsaw_desc` — The classic interlocking jigsaw puzzle. Drag and snap pieces together on the board
- `other_mahjong_desc` — The classic tile-matching solitaire. Match and remove pairs of free tiles from the board
- `other_schulte_desc` — The classic cognitive training exercise. Tap numbers 1–N² in order as fast as you can
- `other_subtitle` — Classic puzzle games — free to play, no download required.
- `other_sudoku_desc` — Classic 9×9 Sudoku. Fill every row, column, and box with digits 1–9. Daily puzzles

profile (1 keys)

- `profile_game_history` — Game History

puzzles (3 keys)

- `puzzles_section_daily` — Daily Logic Puzzles
- `puzzles_section_more` — More Games
- `puzzles_subtitle` — Daily puzzles, logic games, and brain teasers — all free, no download required.

pvp (6 keys)

- `pvp_all_modes` — All Modes
- `pvp_debug_btn` —  Debug
- `pvp_debug_moves` —  Moves
- `pvp_debug_position` —  Position
- `pvp_lb_tab` —  Leaderboard
- `pvp_rankings_tab` —  Rankings

pvplb (7 keys)

- `pvplb_col_mode` — Mode
- `pvplb_col_vs` — vs.
- `pvplb_col_winner` — Winner
- `pvplb_empty` — No PvP results yet — be the first to win!
- `pvplb_fastest_note` — Fastest winning times in head-to-head PvP matches.
- `pvplb_play_pvp` —  Play PvP
- `pvplb_win_rankings_btn` —  Win Rankings

pvprk (11 keys)

- `pvprk_best_times_btn` —  Best Times
- `pvprk_col_player` — Player
- `pvprk_col_wins` — Wins
- `pvprk_elo_desc` — Players ranked by Elo rating. Starting rating: 1200. Only logged-in players with at least 5 wins
- `pvprk_elo_h2` — PvP Elo Rankings
- `pvprk_elo_tab` —  Elo Ratings
- `pvprk_empty_elo` — No ranked players yet — play PvP to earn an Elo rating!
- `pvprk_empty_wins` — No PvP results yet — play to get on the board!
- `pvprk_win_count_tab` —  Win Count
- `pvprk_wins_desc` — Players ranked by number of PvP wins.

- [pvprk_wins_h2](#) — PvP Win Rankings

t2kh (20 keys)

- [t2kh_classic_link](#) — 2048 Classic
- [t2kh_fours_label](#) — 4s
- [t2kh_game_over](#) —  No moves left — game over!
- [t2kh_hint_desktop](#) — Arrow keys also move left/right
- [t2kh_hint_mobile](#) — Swipe in any of 6 directions, or tap a button below
- [t2kh_howto_li_arrow](#) — Arrow keys: ← / → move left and right
- [t2kh_howto_li_desktop](#) — Desktop: Q / E / A / D / Z / X — or use the buttons below the board
- [t2kh_howto_li_mobile](#) — Mobile: swipe in any of the 6 hex directions
- [t2kh_howto_p1](#) — The board is a hexagonal grid of 19 circles — 18 playable tiles and one fixed <s
- [t2kh_howto_p2](#) — The stone blocks tiles — they cannot pass through or merge with it. This splits
- [t2kh_htp_link](#) — Full how-to-play guide →
- [t2kh_keep_going](#) — Keep Going
- [t2kh_moves_label](#) — Moves
- [t2kh_name_label](#) — Your name
- [t2kh_new_game](#) — New Game
- [t2kh_other_link](#) — Other Puzzles
- [t2kh_score_label](#) — Score
- [t2kh_subtitle](#) — Tile-merging on a hex grid
- [t2kh_time_label](#) — Time
- [t2kh_win_msg](#) —  You reached 2048!

t2khex (25 keys)

- [t2khex_htp_board_h2](#) — The Board
- [t2khex_htp_board_p1](#) — The board is a hex grid with **19 circles** arranged in a flower pa
- [t2khex_htp_board_p2](#) — The stone splits each row and diagonal into two independent halves. Tiles in one
- [t2khex_htp_classic_link](#) — 2048 Classic guide
- [t2khex_htp_controls_h2](#) — Controls
- [t2khex_htp_ctrl_li1](#) — **Q** = upper-left (↖) **E** = upper-right (↗)
- [t2khex_htp_ctrl_li2](#) — **A** = left (←) **D** = right (→)
- [t2khex_htp_ctrl_li3](#) — **Z** = lower-left (↙) **X** = lower-right (↘)
- [t2khex_htp_ctrl_li4](#) — **Arrow keys:** ← / → also move left and right
- [t2khex_htp_ctrl_li5](#) — Or click the **directional buttons** below the board
- [t2khex_htp_ctrl_mobile_li1](#) — **Swipe** in any of the 6 hex directions
- [t2khex_htp_ctrl_mobile_li2](#) — Or tap the **directional buttons** below the board
- [t2khex_htp_daily_h2](#) — Daily Puzzle
- [t2khex_htp_daily_p](#) — Each day's puzzle uses the same random seed for all players — so the starting ti
- [t2khex_htp_gameover_h2](#) — Game Over
- [t2khex_htp_gameover_p](#) — The game ends when the board is full and no move in any of the 6 directions woul
- [t2khex_htp_goal_h2](#) — Goal
- [t2khex_htp_goal_p](#) — Combine tiles until you create a tile with the value **2048**. You

- [t2khex_http_intro](#) — 2048 Hexagon is a tile-merging puzzle played on a hexagonal grid. Like the class
- [t2khex_http_moves_h2](#) — How Moves Work
- [t2khex_http_moves_p1](#) — When you slide in a direction, all tiles move as far as possible in that direction
- [t2khex_http_moves_p2](#) — After every move, a new tile spawns on a random empty cell — either a 2 or 4
- [t2khex_http_play_link](#) — ► **Play 2048 Hexagon**
- [t2khex_http_scoring_h2](#) — **Scoring**
- [t2khex_http_scoring_p](#) — **Your score increases by the value of every merge. For example, merging two 64 tiles results in a 128 tile.**

ws (32 keys)

- [ws_dodecahedron](#) — **Dodecahedron**
- [ws_farnums_btn_title](#) — **Click to hide numbers on the back of the globe**
- [ws_flag_btn_title](#) — **Flag mode — click to place/cycle flags instead of revealing**
- [ws_info_goldberg_h2](#) — **What is a Goldberg Polyhedron?**
- [ws_info_goldberg_li1](#) — **A Goldberg polyhedron is a convex shape made entirely of pentagons and hexagons,**
- [ws_info_goldberg_li2](#) — **They are parameterized by a value T, which controls the number of hexagons and pentagons.**
- [ws_info_goldberg_li3](#) — **T=1 gives the dodecahedron (12 faces, 0 hexagons). T=3 gives the truncated icosahedron.**
- [ws_info_goldberg_li4](#) — **Larger T values produce progressively rounder, more globe-like shapes with hundreds of faces.**
- [ws_info_howto_h2](#) — **How to Play**
- [ws_info_howto_li1](#) — **Drag the globe to rotate it and inspect any face.**
- [ws_info_howto_li2](#) — **Left-click** a face to reveal it. Blank faces (0) auto-expand to reveal neighbors.
- [ws_info_howto_li3](#) — **Right-click** a face to place or remove a flag (🚩) on a suspected mine.
- [ws_info_howto_li4](#) — **The ↺ button resets to a fresh board. Your timer starts on your first click.**
- [ws_info_howto_li5](#) — **Win by revealing every non-mine face. All remaining mine faces are flagged automatically.**
- [ws_info_sizes_h2](#) — **Board Sizes**
- [ws_info_sizes_li1](#) — **Dodecahedron** — 12 pentagonal faces, 2 mines. The simplest possible board.
- [ws_info_sizes_li2](#) — **Beginner** — 32 faces (12 pentagons + 20 hexagons), 4 mines. The classic Minesweeper board.
- [ws_info_sizes_li3](#) — **Intermediate** — 72 faces, 8 mines. Enough faces to require rotation.
- [ws_info_sizes_li4](#) — **Expert** — 252 faces, 50 mines. A large, dense board that demands strategy.
- [ws_info_sizes_li5](#) — **Custom** — Choose a T-parameter to generate any supported Goldberg polyhedron.
- [ws_info_strategy_h2](#) — **Strategy Tips**
- [ws_info_strategy_li1](#) — **Rotate constantly.** Information on the far side of the globe is often the key to solving a board.
- [ws_info_strategy_li2](#) — **Pentagons have 5 neighbors, hexagons have 6.** A number on a pentagon only counts its 5 neighbors.
- [ws_info_strategy_li3](#) — **Track the whole surface.** Unlike a flat board, a chain of blank faces can wrap around the globe.
- [ws_info_strategy_li4](#) — **Flag early.** With cells distributed across a 3D surface, a flag can prevent a dangerous guess.
- [ws_info_strategy_li5](#) — **Start on Expert with a center click.** A first click near a dense area can reveal a large portion of the board.
- [ws_info_what_h2](#) — **What is Worldsweeper?**
- [ws_info_what_p1](#) — **Worldsweeper is Minesweeper played on a rotating 3D globe. The board is a sphere.**

- **ws_info_what_p2** — Because the board is a closed 3D surface, there are no edges or corners at all.
- **ws_instructions** — Drag to rotate · Left-click to reveal · Right-click to flag
- **ws_t_param** — Goldberg T parameter:
- **ws_view_lb** — View Leaderboard

Ukrainian (uk) — 412 missing

aria (6 keys)

- **aria_move_e** — Move right
- **aria_move_ne** — Move upper-right
- **aria_move_nw** — Move upper-left
- **aria_move_se** — Move lower-right

ws (32 keys)

- *ws_dodecahedron* — **Dodecahedron**
- *ws_farnums_btn_title* — **Click to hide numbers on the back of the globe**
- *ws_flag_btn_title* — **Flag mode — click to place/cycle flags instead of revealing**

- [ws_info_goldberg_h2](#) — **What is a Goldberg Polyhedron?**
- [ws_info_goldberg_li1](#) — **A Goldberg polyhedron is a convex shape made entirely of pentagons and hexagons,**
- [ws_info_goldberg_li2](#) — **They are parameterized by a value T , which controls the number of hexagons and t**
- [ws_info_goldberg_li3](#) — **$T=1$ gives the dodecahedron (12 faces, 0 hexagons). $T=3$ gives the truncated icosahedron**
- [ws_info_goldberg_li4](#) — **Larger T values produce progressively rounder, more globe-like shapes with hundreds of faces**
- [ws_info_howto_h2](#) — **How to Play**
- [ws_info_howto_li1](#) — **Drag the globe to rotate it and inspect any face.**
- [ws_info_howto_li2](#) — **Left-click a face to reveal it. Blank faces (0) auto-expand to reveal adjacent faces**
- [ws_info_howto_li3](#) — **Right-click a face to place or remove a flag (🚩) on a suspected mine**
- [ws_info_howto_li4](#) — **The ↺ button resets to a fresh board. Your timer starts on your first click.**
- [ws_info_howto_li5](#) — **Win by revealing every non-mine face. All remaining mine faces are flagged automatically**
- [ws_info_sizes_h2](#) — **Board Sizes**
- [ws_info_sizes_li1](#) — **Dodecahedron — 12 pentagonal faces, 2 mines. The simplest possible board**
- [ws_info_sizes_li2](#) — **Beginner — 32 faces (12 pentagons + 20 hexagons), 4 mines. The simplest board with hexagons**
- [ws_info_sizes_li3](#) — **Intermediate — 72 faces, 8 mines. Enough faces to require rotation**
- [ws_info_sizes_li4](#) — **Expert — 252 faces, 50 mines. A large, dense board that demands strategy**
- [ws_info_sizes_li5](#) — **Custom — Choose a T -parameter to generate any supported Goldberg polyhedron**
- [ws_info_strategy_h2](#) — **Strategy Tips**
- [ws_info_strategy_li1](#) — **Rotate constantly. Information on the far side of the globe is available**
- [ws_info_strategy_li2](#) — **Pentagons have 5 neighbors, hexagons have 6. A number on a pentagon indicates how many adjacent faces are blank**
- [ws_info_strategy_li3](#) — **Track the whole surface. Unlike a flat board, a chain of blank faces can wrap around**
- [ws_info_strategy_li4](#) — **Flag early. With cells distributed across a 3D surface, a flag can be placed on a face that is not adjacent to a mine**
- [ws_info_strategy_li5](#) — **Start on Expert with a center click. A first click near a dense area of blank faces is a good starting point**
- [ws_info_what_h2](#) — **What is Worldsweeper?**
- [ws_info_what_p1](#) — **Worldsweeper is Minesweeper played on a rotating 3D globe. The board is a closed surface**
- [ws_info_what_p2](#) — **Because the board is a closed 3D surface, there are no edges or corners at all.**
- [ws_instructions](#) — **Drag to rotate · Left-click to reveal · Right-click to flag**
- [ws_t_param](#) — **Goldberg T parameter:**

ms (68 keys)

- [ms_howto_basic_h2](#) — **Basic Patterns**
- [ms_howto_basic_h3_fill](#) — **Remaining unknowns = remaining count — fill all black**
- [ms_howto_basic_h3_green](#) — **Satisfied clue (turns green) — clear remaining unknowns**
- [ms_howto_basic_h3_max](#) — **Clue = maximum — fill all neighbors**
- [ms_howto_basic_h3_zero](#) — **Clue = 0 — clear all neighbors**
- [ms_howto_basic_p](#) — **These patterns let you fill or clear entire neighborhoods in one move. Always sc**

- *ms_howto_basic_p_fill* — If a clue still needs N more black cells and has exactly N unknown cells
- *ms_howto_basic_p_green* — As soon as a clue turns green its count is exactly met. Every remaining unknown cell
- *ms_howto_basic_p_max* — When a clue equals the total number of cells in its neighborhood, every cell must
- *ms_howto_basic_p_zero* — Zero black cells anywhere in the neighborhood. Every unknown neighbor is immediate
- *ms_howto_board_h2* — The Board
- *ms_howto_board_p1* — Each Mosaic puzzle is played on a grid — the daily standard puzzle uses a 10x10 grid
- *ms_howto_board_p2* — Unlike Minesweeper, the entire constraint system is visible from the start. You
- *ms_howto_clues_h2* — Reading the Clues
- *ms_howto_clues_li1* — A corner cell has a 2x2 neighborhood (4 cells, max clue = 4).
- *ms_howto_clues_li2* — An edge cell has a 2x3 neighborhood (6 cells, max clue = 6).
- *ms_howto_clues_li3* — An interior cell has the full 3x3 neighborhood (9 cells, max clue = 9).
- *ms_howto_clues_p1* — Each number on the board tells you the exact count of black cells
- *ms_howto_clues_p2* — This is the same counting logic as Minesweeper's mine-count numbers — if you can
- *ms_howto_ctrl_h2* — Controls
- *ms_howto_ctrl_li1* — White (empty) — you have marked this cell as not black.
- *ms_howto_ctrl_li2* — Black (filled) — you have marked this cell as black.
- *ms_howto_ctrl_li3* — Unknown — not yet determined; the starting state.
- *ms_howto_ctrl_p1* — Every cell without a clue starts in an unknown state and cycles through
- *ms_howto_ctrl_p2* — Left-click advances: white → black → unknown.
- *ms_howto_ctrl_p3* — Clue cells change color as you fill their neighborhood: a cell with a clue of 3 changes from unknown to black when 3 cells are filled
- *ms_howto_demo_after* — After
- *ms_howto_demo_before* — Before
- *ms_howto_demo_corner3* — Corner clue = 3 — one neighbor already white
- *ms_howto_demo_corner4* — Corner — 4 cells
- *ms_howto_demo_corner4_clue4* — Corner — clue = 4
- *ms_howto_demo_edge6* — Edge — 6 cells
- *ms_howto_demo_edge6_below* — Edge clue = 6 below, interior clue = 6 above
- *ms_howto_demo_edge6_clue6* — Edge — clue = 6
- *ms_howto_demo_interior9* — Interior — 9 cells
- *ms_howto_demo_interior9_clue9* — Interior — clue = 9
- *ms_howto_demo_left4* — Left-edge clue = 4 — already satisfied
- *ms_howto_inter_h2* — Intermediate Patterns

- *ms_howto_inter_h3_cascade* — **Satisfied edge clue cascades up — interior clue forces white row**
- *ms_howto_inter_h3_fill* — **Remaining unknowns = remaining count — fill all black**
- *ms_howto_inter_h3_green* — **Green clue — clear all remaining unknowns**
- *ms_howto_inter_p* — **Once you apply a basic pattern you will often satisfy an adjacent clue for free.**
- *ms_howto_inter_p_cascade* — **A bottom-edge clue of 6 fills its entire 2×3 neighborhood (middle and bottom row**
- *ms_howto_inter_p_cascade2* —
- *ms_howto_inter_p_fill* — **If a clue still needs N more black cells and has exactly N unk**
- *ms_howto_inter_p_fill2* — **Example: a corner clue of 3 where one neighbor is already white. Three cells are**
- *ms_howto_inter_p_green* — **The moment a clue turns green its count is exactly met. Every unknown cell still**
- *ms_howto_inter_p_green2* — **Example: filling the corner's 2×2 block places 4 black cells inside this left-ed**
- *ms_howto_lead* — **Mosaic is a pure-logic puzzle — fill cells black so that every numbered clue is**
- *ms_howto_steps_h2* — **Step-by-Step: Your First Solve**
- *ms_howto_steps_li1* — **Scan every clue for an obvious pattern. Look for 0s (clear all**
- *ms_howto_steps_li2* — **Work corners and edges first. Their smaller neighborhoods (4 or**
- *ms_howto_steps_li3* — **Use green clues to propagate. Filling or clearing cells near a**
- *ms_howto_steps_li4* — **Compare overlapping clues (subtraction technique). Adjacent cel**
- *ms_howto_steps_li5* — **Repeat until all clues are green. Every Mosaic puzzle on minesw**
